

GSM

Stainless steel entry panels with GSM and landline phone modules

The new GSM range from Bpt Security Systems is a telephone based door entry solution. Using GSM or landline technology, this system is designed for applications where a hard wired door entry system cannot be installed. Telephone based technology is ideal for use in environments where there is an excessive distance between a gated entrance and the main building or applications where the entry panel needs to call a conventional mobile phone.

The GSM entry panel range is manufactured in the UK to the highest standards. With a classic brushed stainless steel vandal resistant finish, the GSM is the benchmark for durable, hard wearing entry panel designs. The GSM is available surface or flush mount and can be supplied with an optional illuminated coded keypad.

Versions

Coded keypad entry panel

Standard entry panel

Panel code	GSMVRA/1...GSMVRA/24	GSMVRAK/1...GSMVRAK/24	LANDVRA/1...LANDVRA/24	LANDVRAK/1...LANDVRAK/24
