

Ansagate Parking Management

The affordable way to make your car park pay

The 'Fee Master' provides a simple, cost effective means of managing revenue collection from car park users while simultaneously controlling short-stay, long-stay and seasonal parking access. The time-based system is unobtrusive and easy to operate. It can be installed quickly with minimal disruption to staff and customers.

Its flexibility and modularity makes it an ideal solution for a wide range of parking and general access control applications, enabling proprietors to collect an income from their car parking facilities while eliminating unauthorised parking and thereby reducing frustration for valid users. The system uses low cost magnetic stripe cards to hold access rights and validity time data. Each entry station provides information about initial visitor arrival times, with cards issued at the attendants console strictly control customers' access rights to car parks and facilities as well as the final exit time.

The exit station can be programmed to capture expired, last use and stolen cards.

Benefits:-

Profitable

Maximise the potential of your car park by installing this unique system to generate revenue and secure your parking facility.

Simple

The management console is simple to operate and does not require a PC. It validates entry time, automatically calculates the fee and issues appropriate cards and tokens.
